TO THE ASSISTANT COMMISSIONER FOR PATENTS

Box Patent Application
Washington, D.C. 20231

Transmitted herewith for filing under 35 U.S.C. 111(a) and 37 C.F.R. 1.53(b) is a new utility patent application for an invention entitled:

SHAPEABLE CATHETER

and invented by:

Larry D. Paskar

If a CONTINUATION APPLICATION, check appropriate box and supply the requisite information:

☒ Continuation ☐ Divisional ☐ Continuation-in-part (CIP) of prior application No.: 08/764,745

Which is a:

☐ Continuation ☐ Divisional ☒ Continuation-in-part (CIP) of prior application No.: 07/834,007

Which is a:

☐ Continuation ☐ Divisional ☒ Continuation-in-part (CIP) of prior application No.: 07/730,120

Enclosed are:

Application Elements

1. ☒ Filing fee as calculated and transmitted as described below
2. ☒ Specification having 41 pages and including the following:
 - a. ☒ Descriptive Title of the Invention
 - b. ☒ Cross References to Related Applications (if applicable)
 - c. ☒ Statement Regarding Federally-sponsored Research/Development (if applicable)
 - d. ☒ Reference to Microfiche Appendix (if applicable)
 - e. ☒ Background of the Invention
 - f. ☒ Brief Summary of the Invention
 - g. ☒ Brief Description of the Drawings (if drawings filed)
 - h. ☒ Detailed Description
 - i. ☒ Claim(s) as Classified Below
 - j. ☒ Abstract of the Disclosure

Application Elements (Continued)

3. ☒ Drawing(s) *(when necessary as prescribed by 35 USC 113)*
a. ☒ Formal b. ☐ Informal Number of Sheets 10
4. ☒ Oath or Declaration
a. ☒ Newly executed *(original or copy)* ☐ Unexecuted
b. ☐ Copy from a prior application (37 CFR 1.63(d)) *(for continuation/divisional application only)*
c. ☒ With Power of Attorney ☐ Without Power of Attorney
d. ☐ DELETION OF INVENTOR(S)
Signed statement attached deleting inventor(s) named in the prior application,
see 37 C.F.R. 1.63(d)(2) and 1.33(b).
5. ☐ Incorporation By Reference *(usable if Box 4b is checked)*
The entire disclosure of the prior application, from which a copy of the oath or declaration is supplied
under Box 4b, is considered as being part of the disclosure of the accompanying application and is hereby
incorporated by reference therein.
6. ☐ Computer Program in Microfiche
7. ☐ Genetic Sequence Submission *(if applicable, all must be included)*
a. ☐ Paper Copy
b. ☐ Computer Readable Copy
c. ☐ Statement Verifying Identical Paper and Computer Readable Copy

Accompanying Application Parts

8. ☐ Assignment Papers *(cover sheet & documents)*
9. ☐ 37 CFR 3.73(b) Statement *(when there is an assignee)*
10. ☐ English Translation Document *(if applicable)*
11. ☐ Information Disclosure Statement/PTO-1449 ☐ Copies of IDS Citations
12. ☐ Preliminary Amendment
13. ☒ Acknowledgment postcard
14. ☒ Certificate of Mailing
☐ First Class ☒ Express Mail *(Specify Label No.):* EL474183899US

Letter with attached Declaration and exhibits.

Request That Application Not Be Published Pursuant To 35 U.S.C. 122(b)(2)

18. ☐ Pursuant to 35 U.S.C. 122(b)(2), Applicant hereby requests that this patent application not be published pursuant to 35 U.S.C. 122(b)(1). Applicant hereby certifies that the invention disclosed in this application has not and will not be the subject of an application filed in another country, or under a multilateral international agreement, that requires publication of applications 18 months after filing of the application.

Warning

An applicant who makes a request not to publish, but who subsequently files in a foreign country or under a multilateral international agreement specified in 35 U.S.C. 122(b)(2)(B)(i), must notify the Director of such filing not later than 45 days after the date of the filing of such foreign or international application. A failure of the applicant to provide such notice within the prescribed period shall result in the application being regarded as abandoned, unless it is shown to the satisfaction of the Director that the delay in submitting the notice was unintentional.

LETTER

Dear Sirs:

This correspondence is submitted to provide background to the present newly filed Continuation Application and to provide a discussion for the attached declaration.

Parent Application Status

The present application is a continuation of co-pending U.S. application no. 08/764,745 which is a file wrapper continuation of application no. 08/159,826 which is a continuation in part of the then co-pending application no. 07/834,007, filed on February 11, 1992, which has since issued as U.S. Patent No. 5,304,131; which is a continuation in part of the then co-pending parent

application no. 07/730,120, filed July 15, 1991, which has since issued as U.S. Patent Number 5,290,229 (hereinafter, "the '229 Patent").

The immediate parent application no. 08/764,745 is under final rejection and is currently before the Board of Patent Appeals and Interferences, which appeal is being dropped in favor of this and two other applications.

Applicant requests the opportunity to meet with the Examiner to illustrate models and a video that were sent to the Examiner in connection with the immediate parent application, to further explain the differences between the present claims and the prior art.

Present Continuation Application

The present continuation application has 32 claims of which claims 1, 4, 7, 10, 13, 16, 19, 23, 27 and 30 are independent.

The specification of the continuation application differs from the specification of the '745 application (the immediate parent to this continuation) only by the inclusion of a more extensively detailed discussion of the inherent use of fluoroscopic imaging. This more detailed discussion is disclosed in the '745 application as well as the '229 patent. This more extensive discussion is included because it was already well known to those of skill in the art at the time of the filing of the '229 patent's application on July 15, 1991, that fluoroscopy was inherently known to those of skill in the art for the disclosed procedures. No new matter has been added to the disclosure and the claims of this continuation application are fully supported by the disclosures of the '229 patent and the '745 application.

Additional support for this position is provided in the attached declaration from Dr. James F. Benenati, an expert well qualified to judge the knowledge of "one of skill in the art" in the field of the present invention. Dr. Benenati's declaration provides context and support for the position that the procedures at issue are understood to inherently include the use of fluoroscopy. The knowledge of those skilled in the art concerning the shaping of catheters under imaging such as fluoroscopy is also shown in the articles attached hereto as Exhibits A-R.

Applicant respectfully submits that the present continuation application is patentable, and requests favorable consideration.

Applicants' undersigned attorney may be reached at (314) 552-6580. All correspondence should continue to be directed to the below listed address.

Respectfully submitted,

Gregory Upchurch
